

1/2 **11 a.m.**

The concept: A SINGLE SPACE that transform it's SELF, transform it's COLOR, transform it's LIGHT.

### Solution

The light study reveals that the apartment is not light enough, even during the day.

=> the need to use:

- light reflective materials,
- a constant source of light,
- and avoid opaque partition walls.

Thanks to the configuration, the apartment can benefit from mechanical ventilation, natural, free without additional energy consumption.

=> the need to use:

- Open space.
- Temporary mobile division.
- Avoid static walls.

Based on these simple guide lines, we created a single room, which can be transformed, depending on the activity of the moment (no need for bedroom while serving dinner with friends). We managed to include 11 different activities, so 11 rooms.

Because of the concept, the bathroom and the kitchen may be included in the main room, as part

2/2

## 11 a.m.

The concept: A SINGLE SPACE that transform it's SELF, transform it's COLOR, transform it's LIGHT.
