**Solution**

The concept of the project is simplicity, comfort and functionality. Precisely functions determine the inner content.

Functional zones:**Entrance**

On the left side near the entrance the doorway is widened in plane of the storage system of the north wall till 40 inches for the convenience.

The kitchen is detached from the main room by the mobile partition. This partition also can be stationary according to the customer's desire.

The partition is rail-guided. It is made of transparent glass covered with a mirror sputtering or film from outside.

The glass filling piece between the kitchen and the bathroom is matt and is covered with a mirror sputtering or film from the bathroom side.
