

1/2 New York Apartment

We have created Floor Plans and 3-D views of the New York Apartment Design.

Solution

This New York design was created by Yessica Huizar and Araceli Acosta. We are currently juniors attending Chicago Discovery Academy and this is our first year experiencing Revit. When our architecture teacher introduced us to the New York apartment design contest we didn't believe it was possible to overcome the challenge of meeting all requirements using only 420 square feet; as we progressed with our project we realized we had done it and met all the requirements.
