

1/2 Simple Plan - Many Options

The apartment is designed so 1 or 2 people can live comfortably without reconfiguration of the space.

Solution

The apartment is designed so 1 or 2 people can live comfortably without reconfiguration of the space.

There is a private Bedroom with plenty of closet space. A steam room/ shower connects to the bathroom.

A fold-out sofa and the media wall sits in-between the storage wall that spans the whole depth of the apartment and has room to store all furniture, the workstation, tools and provides additional room for anything that can be out of sight. It is also by a foldout sofa and the media wall

The Kitchen can be open or closed by a screen and provides space for recycling stations on either end. The whole Kitchen Center can be moved against the bedroom, to provide maximum open space when needed.
