

1/2 **at Graham's**

A design that proves that size doesn't matter. Small can be comfortable.

AT GRAHAM'S

THE BATHROOM

GLASS DIVISIONS AND A SLIDING GLASS DOOR MAKE THE SHOWER AREA/STEAM ROOM. A SHOWER IS PLACED IN THE FRONT TO START THE DAY, AND A PLACE TO SIT AND LEAN BACK IS INCLUDED IN THE BACK, FOR A RELAXING AND ENJOYING STEAM BATH, TO END THE DAY.

ZORAN JORDANOVSKI

Solution

This is my solution for Graham's apartment. It is based on open space areas that change their function, divided with multifunctional division walls, which hold the necessary objects that define that specific function or area. All the movements are automated and no physical strength is needed for changing the space. It shows easy and comfortable living in a small and cozy place. Making use of the horizontal as well as the vertical, things open and close, move front and back, left and right. Another important feature of this design is the NYC Box, a space saving furniture. All of this is explained in details in the uploaded files.
