

1/2 **M2 HOMES PROJECT**

A HOUSE SOLID AS A ROCK AND FLEXIBLE AS A PAPERSHEET. The proposed system is developed as a utility model of the EMMEDUE system. The proposed building system is completely self-constructible. The utility model proposed for the \$300 house have been cal

Proceso constructivo con paneles

Apoyado por:

durapanel

Manual elaborado por:

SOLTEC ING

Solution

This means the current M2 process have been streamlined to place just the panels in their original state, avoiding concrete castings and coating applications. Finishes are offered in drywall, plasterboard or similar type.

The house components transportation can be massive and economic, thanks to their light weight. It can be done by Land, Sea and Air.

These are various pictures from different tests conducted by highly prestigious institutions using concrete coated panels.

The experiments corroborate the safeness, efficiency and seismic resistance of the panels. The trials can be watched in the following link:
