

1/2Corrugated HOuse

It is time to participate and not sit without nothing to do and leave others without nohome, whether that causes them in this natural disaster, or by other reasons .The notice thing that the number of homeless are increasing in the world abnormally so we

Solution

The idea Concept is how to make it simple and flexible and easy to get not take time to built or alot of material and cost alot, so i began with rectangle 2x6 covered by corrugated recycled plastic sheets connected with each other and covered by solar cells unit to storge the sun rays to use in it in lighting in night and the structure was so simple it's componant of 4 recycled steel frames wich control the corrugated sheet movement and the interior built in the house to ensure equality and the furniture open when we open our house.
