Solution

Add+

Modular pot system extending temporarily and spatially.

As cities, becoming more and more complex and imbricated, Add allows to become integrated into any vertical and/or horizontal space.

Add consists of a series of 10 different modular plastic cubes with a particular section that allows their assembly through a sliding system.

You can ADD a large cube, a multiplicity of small and medium-sized cubes, creating unusual compositions according to the seasons, wishes or spaces.

2/2

Add+

Modular pot system extending temporarily and spatially.
