

1/2 Waves and color

Waves and color, 3 elements that will completely change the entire restaurant.

Solution

My idea is simple, based on 3 elements that will completely change the entire restaurant.

1. Living sky, that changes as desired, made with fabric, pulleys and sliding systems, has 3 functions: control, solar incidence on the glass wall, create more intimate settings for private gatherings (fabric walls), and finally, being an acoustic insulation, for a site which 150 people will be talking and making sounds at the same time

2. a wall that also appears to be alive, that changes color, thanks to temperature-sensitive tiles, currently on the market. Color is controlled from behind, with injections of heat or cold from the oven or cold rooms of the kitchen.
