

1/2 Silent Transitions

I was inspired by the concept of 'silence'

Solution

This interior is inspired by the concept of 'silence'

There are mainly architectural transitions:

Wall will be separate (the gap you see in the dramatic area)
The wine-seller will appear (was hide in the main wall),
The stools will be include in the counter design

The piano rotating platform.
The general light will change configuration and the mood area will come out

Personal atmospheric sound and light areas for changing the mood:

Up/down automated ◆ Ceiling light Dome ◆ with directional speakers to target sound like a stage spotlight to one defined dinner table area. The tables include a projector and touch screen.
Have a look and thanks for your attention
