

1/2 **Well-House**

Wellhouse is a building with built-in groundwater well and rainwater collector.

**OLD** ones

**Solution**

Every existing building can become a Well-House.

The concept features:

- built-in artesian well installed into building water system
- + rainwater collectors on the roof connected with building sewage
- + photovoltaic panels on the roof, connected with water pumps
- + sand filters

Positive impact:

- Artesian Well provides building with potable water (after filtering).
- Rainwater collectors supply with gray water (after sand filtering rainwater can be used only as gray water)
- Sand filters are the most economic

2/2

## Well-House

Wellhouse is a building with built-in groundwater well and rainwater collector.
