

1/2 **SODIS Architectural Application [WIP]**

This design is based on the SODIS [Solar Water Disinfection] technology currently used by several world organizations in developing countries, and creating a relevant architectural application within the umbrella of green urban context.

**Solution**

[WIP - please refrain from scoring at this point in time. thank you]

This design is based on the SODIS [Solar Water Disinfection] technology currently used by several world organizations in developing countries, and creating a relevant architectural application within the umbrella of green urban context.

Presentation is divided into color-coded catch-themes, which can be later applied into the marketing scheme of the design project. It is not a scoring gimmick -its just the way my brain works when designing: a complete package. The themes will be reverse in order, to provide easy access for Jovoto community. The word-play is intentional, and SODIS is read as So This throughout them.

Each Catch-Theme will cover aspects of the design under their focus. The bulk of this design will be

2/2

SODIS Architectural Application [WIP]

This design is based on the SODIS [Solar Water Disinfection] technology currently used by several world organizations in developing countries, and creating a relevant architectural application within the umbrella of green urban context.
