

1/2 Using hydrogels

Using hydrogels... superabsorbent polymers to store water and release it slowly.

HYDROGEL - highly absorbent natural or synthetic polymers that can store 99.9% water in the soil and then release it as the plant's roots need it

Solution

Using hydrogels ...
 This is stuff is actually used at this moment in the world like illustrated
 ♦ but since I ♦d already made the drawings ♦ maybe someone will be inspired and use this substance for something else :-)

Status: 18.06.2018

2/2

Using hydrogels

Using hydrogels... superabsorbent polymers to store water and release it slowly.
