

1/2 **FlashMop**

FlashMop - An unusual cleaning's performance!

**Solution****FLASHMOP**

Flashmop is not a tongue twister but it is an expression that emphasizes the desire to clean swiftly!!!! How much water is wasted every day for cleaning of apartments, hotels, hospitals, gyms..etc ...???!!?! ◆FLASHMOP is a system that retrieves the water produced from the sink, purifies it and collects it in the bucket of mop under the washbasin. The bucket is hidden, incorporated under the sink and with a simple gesture, you pull and it is ready for the use. Cleaning at your fingertips!!!! The system consists of:

- 1) wash basin that serves as a bowl (when someone uses the bowl, the sink works the same) ;
- 2) purification system with activated carbon filter;
- 3) mop incorporated under the washbasin;
- 4) laser that measures the water's
