

1/2 **future space : smart room/ hotel**

future space /smartroom/hotel

Layout of service apartment /hotel suite

Solution

An intuitive, interactive, tech savvy, customisable, power generating, modular leed rated hotel room and hotel building.

Explanation for multi-experience hotel

The hotel rooms on the outside look onto the outside world. Some of the inner rooms overlook an inner experience space which recreates different experiences in smaller scale. That experience space can be a mini rainforest or a mini sandune or a lake like water feature or a waterfall , full height aquariums , a rock climbing area or even a sensory deprivation or enhanced creativity space...an artistic interpretation with sights , lighting and sounds.. This will provide a retreat or relaxation or an exciting experience within the hotel itself and expanding the hotel room and hotel into a an experience

space rather than static space. This allows more local people who may not have a lot of money to travel far
