

1/2 me and all services - english update

me and all services - full concept with suggestions for an efficient and enjoyable stay

me and all SERVICES **3**

Mobile Application

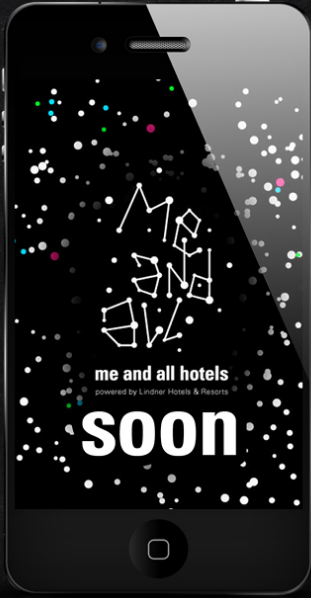

The me and all app for smartphones and tablets is one of the key points for the overall concept. Here everything comes together, from the user profiles to the billing.

The app is the central hub, it decides on the access to a hotel room and guides the visitor through the hotel and the region.

The app includes a route planner based on Google Maps, which proves to be ideal in combination with Google Street View.

List of function:

- Check in / Out
- Room key / Area access
- NFC Wallet
- Navigation in Hotel and Region
- Profil Management (e.g. Find a Pro)
- Eventfinder/planer
- Hotel Service System
(Wake-up-call, Breakfast in Bed etc.)
- Room Setup
(Window shades, Temperatur, TV, Lightning mood, ...)

me and all hotels

Solution

Offline Services

Offline Services are the on-site innovations, in a hotel room, lobby, lounge, etc.

All the desirable stuff in the hotel itself.

HotelPad & App

Each guest has the opportunity to use the me and all hotelPad. It could be placed in each room or can be rented separately. It has in addition to the typical functions, such as surfing the web, extensive special features, for example the control of the hotel room itself like open or close the roller blinds, light mood, tv remote, temperature and a wake-up call function. The hotelPad stays with the guest over the complete stay and can also be used as a City Guide with included Navigation. For guests who want to use their own pad / Smartphone, an app can be offered to every guest
