

1/2 **new Generation =) Bottle crate**

1. creating bottle crate from waste! 2. folding boxes together with a one simple motion!

Solution

bottle crate for 0.5l bottle
creating bottle crate from waste -

extruded plastic waste + waste
cardboard + new technology

I think that the use of materials
recycled from waste (plastic, paper)
with the addition of cardboard
empowers people to not pollute the
planet

We are able to use recycled
materials for our needs!

The form of our creating bottle are
economically and ergonomically
advantageous to use for different
categories of people!

Example of good use of the material
and the combination of durability
and environmental friendliness is a
@Paper wallet@ wit? material
Tyvek® (consisting of high density
polyethylene fibers) that was
created with a strong paper which
is waterproof and does not break,
then why we can not substitute
