## **RISING FLOOR**

i thank all the people that watched my solutions, even though they didn't fully appreciate them.

How does your idea solve the problem?

The floor can be a revolutionary idea in solving the maximisation of the space in both private and public by hiding the furniture straight into the floor. With very simple assembly and maintenance the floor can be transformed into modern chairs and tables or other furnishings. Through this innovative idea famous chairs and tables may be reproduced rising from the floor. A special touch is added by the choice of hiding the furnishing straight into the floor through its unique design.

Which materials are you using and why?

The main advantage of this solution is that any type of the current production of wood from the field or other material (concrete, epoxy resins, tiles, plastic, etc) or other more technical solutions from the contest(the wooden shapes may be embedded in any type of horizontal solution). This furniture will always be made of wood combined with the rest of the floor that may be made of different materials than wood, so that from the aesthetical point of view we could play with different textures.
