

1/7 **kitchen stack**

modular Eventkitchen

Solution

Outdoorkitchen, diningtable and two benches, in their basic design almost identical, form a base unit, which can be supplemented with other units and kitchenmodules. The single elements made of Corian (or similar resilient composite material) can be stacked over each other and allow a space-saving transportation and storage

2/7

kitchen stack

modular Eventkitchen

What's the benefit for the target group?

Easy transportation, compact storage, flexible configuration

3/7

kitchen stack

modular Eventkitchen

How does your idea solve the problem?

Each element (outdoorkitchen, diningtable and benches) consists of the same basic design in different sizes so they can be stacked over each other. The outdoorkitchen can be equipped with different kitchenmodules by easily hanging them in the basic unit

4/7

kitchen stack

modular Eventkitchen

What could be the perfect event to implement your approach/object?

Small and large events with professional catering

5/7

kitchen stack

modular Eventkitchen

Which problem is solved by this idea?

Events can take place outdoor without a long build-up time for the catering. Easy and space-saving transportation make the system mobile and the modular structure of the outdoor kitchen makes a high flexibility possible

6/7

kitchen stack

modular Eventkitchen

How many guests can participate in your outdoor dinner?

Each unit consists of one kitchentable a diningtable and two benches, which offers space for 6 persons

Dining Outdoors

unique
