Visual Solution

MY COWORKING STATUS FLAGS

Looking forward

- the idea of cardboard status flags could also be transferred to a digital/electronic solution
- a little device with (LED) lights can be added to the laptop or desktop-screen to show the current status by different light colors (e.g. red, green, yellow ...)
- the device could have an internal power supply or it can be connected with the screen or computer via USB or bluetooth for power supply and data input
- the status can be changed on the device itself or via a little app that can run on the laptop/computer.

BYE BYE...
