

1/2 **Synergy - iT- DESK and Data enabled furniture co- workspace**

Synergy/working together-data /tech enabled furniture,desks with/without flip top. Wireless charging

360 Table - DREI SECH NULL TABLE

Rotating double table/ workstation. Use as single person table when closed as workstation at 90 degree or as as two tables in any direction or as collaborative extension to join to other tables in any direction. Inspired by Drei Sech Null name and by clock positions The table is able to rotate in any direction clockwise or anticlockwise because of a rotating swivel plate joining the two tables. One table in slightly longer than the other so that the leg portion with castors can be accommodated. Lock in any position. The table allows many different permutations of arrangements depending on how you link the tables. Combinations of open table, closed table and the tables at 360 different angles..each one forming organic movable arrangements. Link the second 360 table any way , any direction and then the third 360 table. etc. Join with other types of tables etc. in combinations

Solution

Synergy meaning working together.. as furniture that works together and as furniture, desks , accessories that promotes co-working together.. with or without flip top which are data enabled and have embedded wireless chargers. Integrating and designing furniture with technology embedded or that which enables touchscreen based or tablet based use in future. The need for very large spaces is going down with the use of tablets, ipads, laptops etc. What we need are flexible elements that can be used many ways.

Synergy addresses that need.Along with ideas SCT Sofa Chair Table ( pronounced Seat) and Casi ( Collaboartive Alternative storage and I) it forms a package of flexible spaces.. SCT and Cobi will be seen in the renders as side elements)

Elements

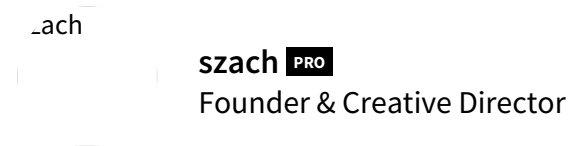

- 1) iT- desk
- 2) 360 tables,
- 3) Tow tone two color seat

2/2
