

1/2 **The yourfone.de Sun Protector**

Case for your smart phone that you can use on sunny days. It will keep your display from direct sun!

**Solution**

This smart phone case with the little umbrella is made to screen your display from the sun, so you can better read your display.

It has a flexible arm, you can click it to the side, if you don't use it. Ideal for beach trips or just for fun. It's made of soft plastic or rubber, so it's cheap production. I think it's a very funny idea for young people!

- Funny gimmik
- Nice for on the road (beach, ocean, boat etc.)
- yourfone branding element (umbrella)
- low costs in production
- two different colours (or more)
- alternativ tablet version
