

1/2 **Waveform (UPDATED)**

Waveform is flexible device stand that gives shape and positional control to the user!

Solution

PROTOTYPE MATERIAL IS USED FOR TESTING PURPOSES AND WILL NOT REFLECT THE FINAL PRODUCT. PLEASE SEE 3D RENDERS FOR HOW IT WILL FINALLY LOOK :)

Buy it, use it, bend it, fix it, Pinch it, change it, love - upgrade it, Mold it, cage it, fix it, surf it, Work it, rate it, copy-paste it, Name it, View it, touch it, feel it, flex it, press it, love - and name it!!!

Waveform is a sturdy but flexible device stand that gives full control to the user to allow them to mold and position their device to their desired viewing angle. Great for travel, on the sofa, in bed and most other places of desired content viewing.

Currently the material is being researched as we realize this is key to the success of the product. It has to be strong, flexible and sturdy enough to last the time of frequent use. Update to come soon.

2/2

Waveform (UPDATED)

Waveform is flexible device stand that gives shape and positional control to the user!
