

## 1/2 **your-amp** Der faltbare iPhone Lautsprecher

A foldable iPhone speaker - made out of cardboard.

### Solution

your-amp

The idea is a foldable iPhone speaker - made out of cardboard; affordable, reusable, recyclable and functional.

The basic shape of the speaker is a flat, but pre buckled carton. Before it can fulfill it's purpose, it must be folded.

The functionality is similar to a classic gramophone. The sound from the internal speaker of the iPhone will be reinforced through a cone.

The speaker can be folded separately for transport or storage, fits perfectly in your purse, pocket or book.
