

## 1/2 Proposed Out door Dinning designed for Community Hotel

Dinning in outdoors: Dinning in outdoors is rare and makes a pleasure to human natures. Natural environments are connected with human natures. In this design, I use timber log by cross cut as per selective diameter. Which make new enjoy too, for the

### Unique Dinning Outdoors

Details conceptions Out door dinner plan and design idea No-3,  
New York Community Hotel, date-18-06-2012,  
Conception and designed by Engr.Amirul. Concepts-3

### Solution

Own times enjoying and relax in holy-day.

Cottage: This is temperature control and protected from outer weather. A house but open for enjoying out door environments. The materials of cottage shade is Dry straw of Paddy grass. Cheaper and protected from outdoor temperatures. Environmentally favorable to enjoy times in holydays.

Chair: Made from log of tree as required diameter with 2" inch app. thick circular shaped. Circulated colorful aluminum belt on thickness boarder. Supported by 1" inch diameter stainless steel hollow pipe. So, there are two circular logs. Another one is supported on ground level as shown in design. There are back vertical aluminum Plate to supporting the back bone for comfortable sitting and colorful for different sittings.
