

1/6 **Element**

Inspired from the T-air concept based on natural figures & creating a garden in the city landscape!!

**Solution****ELEMENT DEFINITION:**

1. a component or constituent of a whole;
2. a natural habitat, sphere of activity

ECOLOGICAL CONCEPT

The "nenuphars" are the inspiration of this architectural concept, giant lily pads will serve as a roof to protect users from the rain and sun. Some will also be equipped with solar panels and directed towards the sun to generate solar energy that will be stored and used at night to lighten up the station.

FUNCTION

The roof acts partially as a solar energy collector and partially as a rainwater collector. Depending on the orientation of the site, the

highest "nenuphars" are positioned facing toward the south to capture the most solar energy possible. The
