What makes your service station unique?

It will produce its own wheatgrass to sell to the costumers. It has a place to leave your children while you enjoy your time off and relax.

Which services does your service station offer?

Eating, reading, exercise or relax as you wish. A place to recharge your and your appliances batteries. It will have a book exchange place where you can bring one book and take another with you. And it will have still bikes to exercise if you have been driving for a long time.

What design style are you choosing for your service station and why?

Well, I am thinking in Copper for the Facade, because is recycled and it lasts for ever and gives you the freedom of curves and design. The FACADE design is inspired in TOTAL LOGO, different shades of copper to remind the curve stripes which come together. Also I would like to include as much green materials as I can for the project. Like energy generating tiles pavement, etc.
