

1/2 Successful Solar Pumps straight from Tunisia

Effective, simple Solar pumps, able to extract water from much deeper than 5m - Energy Globe Winner

Solution

The Idea is not mine, and I don't expect any award for posting it. Just sharing here.

It's been successfully implemented in several villages of Tunisia by ZOE onlus association, represented by Mr. Paolo Buccieri. The most challenging task was to convince local people of the effectiveness of solar energy, but since they were involved into the project they also saw the results quite promptly.

You can watch the material here: <http://youtube.com/watch?v=wBkAIAxfGqc>
And here is about this National Energy Globe Award winning Project: <http://energyglobe.info/awards/nation>
