

1/2 renewable energy powered and portable water pump

renewable energy powered and portable water pump

Solution

as it is a portable solar panel it is theft preventing and very user friendly farmers can use it easily

robustness and portability is seen it is robust under the climatic condition of bihar

solar panel uses sunlight to power the pump thus the renewable form of energy which is ecofriendly and protects our precious environment from the pollution caused by the dirty diesel pumps.

it is affordable as it costs below 1 lakh indian rupees.

the pump can minimum of 1 hectare in bihar
