HummingBird -a classy retroversion-

Solution

hey, it's six in the morning. and everyone loves to have a cup of coffee. everything is made from the fresh. the wind of coffee has its own energy. it is a hummingbird that serve this tasty ones. -hmm

let's make a coffee, hmm, we have coffee beans here, but first let's roast them. the roasting tube is located in conjunction between water tank and brewing unit. okay, turn the first knob, let's see the cooking looks, so the tube is replaceable with acrylic ones if there should be a visible green beans. after waiting, yes! the roasting done! then we detach the roasting tube, let's proceed directly to brew this. hmm, unfortunately we have to prepare the water, oh, the water has been prepared yesterday, luckily this vapor chamber stainless steel tank is really reliable on storing my hot

water. i think we should make it hotter a little bit! turn the second knob.
