

1/2 **Book concentrated solar power technology (BCSP)**

An integrated and inventive power/pumping technology, may represents an effective solution .

**Solution**

Book Concentrated solar power technology (BCSP) is an integrated, easy and effective power/pumping technology, described as a technology of sustainability, contribute in the challenge of “A Watershed Moment in India” as a solution meets the requirements and be applicable in the case of Bihar and others.

BCSP tech based on the concept of the deep solar structures has a radial structure able to be folding easily like a book. see the attached files.

BCSP works:

The system designed to be used easily by any person and does not need to experience in its operation, simple steps:

1 – Move it to the place (e.g. the field).

2 - Open the energy panels (as opening a book).
