

1/5 **Khokhloma**

Solution

Khokhloma is the name of a Russian wood painting handicraft style and national ornament, known for its vivid flower patterns, red and gold colors over a black background, and the effect it has when applied to wooden tableware or furniture, making it look heavier and metal-like. It first appeared in the second half of the 17th century in what is today known as the Koverninsky District of the Nizhny Novgorod Oblast.
