

1/2 XYZ - mind lab

In math, the position in space of any point is determined by the 3 Cartesian coordinates.

XYZ

In math, the position in space of any point is determined by the 3 Cartesian coordinates.

While transportation is about movement and position, the future innovation lab of DB will stand for an exact, scientific approach of the sector, where ideas are researched at high thinking and analytical standards.

The behaviour of the brand is scientific, precise, innovative, solution-demonstration oriented, speculative and algorithmic.

Solution

In math, the position in space of any point is determined by the 3 Cartesian coordinates. While transportation is about movement and position, the future innovation lab of DB will stand for an exact, scientific approach of the sector, where ideas are researched at high thinking and analytical standards.
