

1/2 **squeeze / twist / cut**

one tool. three gestures, any angle

Solution

one tool. three gestures, any angle. cutting on the spot has never been easier. with this tool, all you need is one hand, three simple and intuitive gestures to operate it and of course something that needs to be cut. you SQUEEZE to grab and secure the wooden strip in position, you TWIST if the angle of the cut needs to be readjusted, and simply slide the blade for that fast, precise cut you need. HOW exactly does it all work? browse through the slides, and see for yourself...
