Water(soul) Bottle(body)

What was the task for the work you show here?

The task of the contest was to design a bottle of water for a very known Romanian company.

Water(soul) Bottle(body)

What was your unique idea?

Our idea was to create a simple and clean bottle design to become host of the pure water. The surface defined by soft curves flows from top to bottom, generating a simple and attractive shape. The texture of the bottle symbolizes the water's journey through a network of intergranular spaces (the texture of the lower part), until it emerges into a pure liquid (the texture of the upper part). The design keeps a low center of gravity which makes the bottle easy to handle.
