

1/4 Jewel Garden

Inspired by hanging terrariums, I wanted to create a playful, bold and fantastic artificial garden.

Solution

I hand-drew all my motifs and then vectorized and coloured them in Ai. I created an all-over pattern, a border print and a placement print to show the versatility in which the concept and design can be used.

Why does your design stand out?

I stayed true to my style and aesthetics as a designer creating a design that differs to all others in the use of very bright colors, but also in the shapes I used to create my motifs. My inspiration were real flowers and terrariums, but my motifs are whimsical abstractions of them, which together create a very quirky, fresh and imaginative artificial garden.

Inspired by hanging terrariums, I wanted to create a playful, bold and fantastic artificial garden.

Which kind of brands do you imagine using your design?

I imagine my design being used by playful brands with an eccentric style - a brand whose client is not afraid of using bold colors and patterns, and that loves using statement pieces that make him/she stand out from the crowd.
