The Chinese ceramics served as an inspiration for my work.

TexSTYLE Collection

**Solution**

I wanted to create a module which could achieve different symmetrical compositions. The texture allows the usage of many different color combinations. With some various tones I created a wide application possibility - from summer clothing to wedding dresses.

Why does your design stand out?

texSTYLE is flashy, colorful and individual. It is suitable for every person or clothing in a diverse color palette. The best thing is that my design carries the emotion of the Far East, which was my goal all the way.

Which kind of brands do you imagine using your design?

My texSTYLE is a complex and multifunctional design which gives vast possibilities for any brand. By alternating the module size or its color you can easily appeal to different target groups or tastes and be successful.

Is the design 100% created by you or is there anything we should know about any third party material used?

I'm the sole creator of the texSTYLE design.
