

1/10 Messages & information coding

A flash based service for receiving, building, presenting and sending confidential information.

Solution

The only way the messages and information to be seen from third party is remote desktop which can be prevented easily. The owner of the website is not able to understand the content of messages and images on his server (the info is confidential). This innovation service can be modified and applied to websites for confidential co working platform and confidential websites (business, political, religious or else).

2/10 **Messages & information coding**

A flash based service for receiving, building, presenting and sending confidential information.

In summary, what is your “Made on Coboat” project idea (max. 3 sentences)?

Writing codes and studying a bit of PHP because I need it for the task.

3/10 **Messages & information coding**

A flash based service for receiving, building, presenting and sending confidential information.

How much of your project can you realistically achieve in 100 days if you will get the chance to stay on the Coboat?

I can achieve the project for 40-50 days. The rest I will enjoy life :) May be I write a book with my adventures....the first book.

4/10 **Messages & information coding**

A flash based service for receiving, building, presenting and sending confidential information.

Will you complete this project on your own, or will you be working with a together with a team?

A bit help will be great.

5/10 **Messages & information coding**

A flash based service for receiving, building, presenting and sending confidential information.

Why should your project be chosen?

Because it is important. Because I have other ideas that a good environment can help me understand better and achieve them in the right way. I think being with highly professional and intelligent people will boost my professional growing, skills and understandings.

6/10 **Messages & information coding**

A flash based service for receiving, building, presenting and sending confidential information.

What does this project mean to you?

Mostly that I make something significant that does matter. Probably I can make some money.

7/10 **Messages & information coding**

A flash based service for receiving, building, presenting and sending confidential information.

8/10 **Messages & information coding**

A flash based service for receiving, building, presenting and sending confidential information.

Have you used any third-party material? Even if you've modified it, please ensure you source the original here. See FAQ for details.

no

9/10 Messages & information coding

A flash based service for receiving, building, presenting and sending confidential information.

Please tell us a bit about yourself and your professional background. How do you fit into a team? What have you done before within the field of your idea?

I am freelancer Graphic and web designer. In my past I did work 2 times in Alaska and in Gran Canaria, Tenerife, Lanzarote, Majorca, Czech Republic. I was programmer, entertainer, cooker, bartender, seller, cleaner, dishwasher, driver and what you can imagine. Wining in Jovoto.com is part of my legacy. In the field of my idea I made some tests so I can be sure that is possible.

10/10 Messages & information coding
