## MONSTERS

Have you seen them?

What is the story behind your design?

I like monsters cause on my opinion, a monsters is pure creativity. I always hated when people ask me "Who's that?". Sometimes is just no one , just something invented, something that exist just on your head. So you can see monsters anywhere you want, even on the Swiss Alps. Just never grow up and lets continue seeing those monsters.

Is there a connection between your design and the Victorinox brand?

Yes. The monsters are the representation of the infinity of possibilities you can do with a Victorinox Knife, it can save your life or you can be an artist if you used it well. They were all hidden on the mountains like a closed Knife, and then they came out like the tools of the Knife. Also they are all different, as what I said before, you can do all what you want, with a Knife, just have to be creative. So never grow up and let's continue seeing those monsters.
