

1/5 **Concrete & Wood**

Minimalist house by the water

Solution

This is a house in the suburbs, with great views and water surroundings. The house is built maintaining a simple and pure design integrating the big garden and lagoon views with the interiors. The main materials used for this project are reinforced concrete, Wood, Corten Steel and glass.

## **Concrete & Wood**

### Minimalist house by the water

Explain how and why you created this work. Was it for a specific brief, etc.?

This house was designed and built according to client's requirements. They wanted a house with simple pure lines, constructed mainly in reinforced concrete, but with warm and hi end finishes in the interiors.

## **Concrete & Wood**

Minimalist house by the water

What were you trying to express?

In this project I intended to blend the hard and cold concrete with the warmth of wood, creating a contrast between brutalism and classy modern finishes.
