

1/5 **fractal collection**

some new ideas for fashion and fabrics

**Solution**

This collection of patterns was created within 8 months. I was in love with fractal and in this collection, I tried to mix fractal with classical baroque pattern. You can see more here <http://elusha.top/> And you can follow my work here - <https://www.facebook.com/Elusha-772301782901790/> This is the story of a dreamer. I am 41 years and I am a single mother of two beautiful children. I am an architect and designer. I worked as an interior designer and architect until I have not had children. When I got children in my life i must be reduced work in architecture to have more time for children. And in parallel, I began to try to engage in competitions. And I began to win competitions. They gave me a chance to survive with children. At Jovoto, were competitions tissues a year ago . I do not wins the prizes. But I realized that I was in love with the process of creating tissue and that I can create something really new and unique. I decided that if I did not try it now then maybe I will
