Augmented reality

Advanced live translator

Homely uses complex algorithms to partner ideal users based on their expectations. Also it uses augmented reality to connect people's points of view during the experience. An advance live translator makes sure language will be no barrier.

**Solution**

A platform created to save the art of cooking at home by asking the help of the most experienced and passionate. It connects people from different parts of the world to collaborate in every step of the learning process of cooking, from picking the best ingredients at the market, to cooking them in the ideal way. Homely uses complex algorithms to partner ideal users based on their expectations. Also it uses augmented reality to connect people's points of view during the experience. An advance live translator makes sure language will be no barrier. Let's start cooking!
