

1/2 **Ingredients**

Also I propose writing hashtag on the package or box in which the products are delivered. Hashtag "#ingredients" (or another name of it) - the name of the application / business. Thus, when people take photos, they will share it through this hashtag. And to see other people, their processes of preparation and the fact that they came out!

Possibility to cook yourself a meal is not only fun, but also provides confidence under conditions food preparation, in the product freshness.

Solution

[the idea is not about super future) idea about the value of food and its role in life, about the process of eating / cooking]
