

1/2 **DroneButler**

AI food delivery service

A presentation slide for DroneButler. The background is a blue sky with white clouds. On the right side, there is a photograph of a white quadcopter drone with a camera mounted underneath. The text on the slide is as follows:

**DroneButler**

Ever struggle to decide what to eat?

Open the DroneButler app when you are hungry and click "deliver".

Using AI, DroneButler will know what to bring you based on your preferences, past habits, and future goals. It pulls data from sources like Fitbit, MyFitnessPal, Email, & Social Media to intelligently determine what to bring you.

DroneButler will then collect your meal or snack from a local restaurant, deli, or supermarket and deliver it to your current location.

And, of course, if it gets it wrong, there are backup options. The more you use the DroneButler, the more intelligent and accurate it becomes.
