

We care for the caregiver.

1/6 TEVA CareHelp

Helping you take better care, even when you're not there!

The slide features a header with the TEVA CareHelp logo and the slogan "We care for the caregiver." Below this is a portrait of Jazkan, a man from Pakistan. The main content is a diagram of a robotic head with five callouts: "Remotely Connected 24/7 With Guardians Doctor Hospital Emergency Services", "Programmable Dosage Administration", "Patient Entertainment Screen + Projector", "Patient Attendance & Monitoring", and "Patient Physical Assistance". To the right of the diagram are three numbered sections: 1. "What situation and/or problem was the caregiver facing?" (ie. coping, knowledge, medical aids, mobility, organisation; refer to project kit for more details) - Helping you take better care, even when you're not there, TEVA CareHelp is a robotic AI solution designed to help care-givers directly in their mobility, medical aids, and organization, all with complete peace of mind. 2. "How does your idea help to solve it?" (How does your solution relieve or assist the caregiver?) - Allowing patient attendants to take time off for their daily activities/work, their Robotic CareHelp will be constantly by their love ones' side, taking care of all their needs including dosage administration, taking vital readings and patient monitoring, keeping them entertained and cared for, and relaying back info to care-givers/doctors/hospitals. 3. "What are the unique aspects of your idea?:" (What sets your idea apart from others?) - It's an all-in-one solution, that frees up the care-giver both physically and more so emotionally, letting them to freely go about their daily business and dedicate time to their own work and leisure, which otherwise would be needed for patient care.

Solution

An Ever Present Patient Attendant
Allowing patient attendants to take time off for their daily activities/work, with the peace of mind that their Robotic CareHelp will be constantly by their love ones' side, taking care of all their needs including:

- 1) Dosage administration
- 2) Taking vital readings & patient monitoring
- 3) Keeping them entertained cared for
- 4) Relaying back info to care-givers/doctors/hospitals

We care for the caregiver.

TEVA CareHelp

Helping you take better care, even when you're not there!

Describe a caregiver situation that you were/are involved in.

Being a working professional, I always have to choose between care-giving and work.

Status: 15.06.2018

We care for the caregiver.

3/6

TEVA CareHelp

Helping you take better care, even when you're not there!

Explain the caregiver problem that resulted for you and/or other caregiver(s).

Caregivers have to dedicate long hours/days to patients they are taking care of. This includes the time which one could otherwise productively use, for work and personal needs.

Status: 15.06.2018

We care for the caregiver.

4/6

TEVA CareHelp

Helping you take better care, even when you're not there!

Describe your caregiver solution that would provide assistance or relief to the problem of the caregiver.

TEVA CareHelp is a robotic solution for care-givers that allows them the time and freedom they need for work and other activities which too might be vital to the whole care-giving scenario.
