

We care for the caregiver.

## 1/6 Teengivers

Combine caregiving with technology for sharing experience

### *user case scenario*

### Solution

The age of 13 to 19 years old is very crucial for a person. The family and school play a key role in his nurture but not only. The incentives a teenager gets contribute a great deal to the formation of his personality. Sports, hobbies and other extracurricular activities are very important for young people to get more mature, broadminded and independent.

Teenagers use technology in a great deal and unfortunately most of them are addicted to their mobile phones. They spend hours every day on their phone and generally they prefer to share their ideas, thoughts and experiences through the online world.

Concerning caregiving, helping people with disabilities could be a way that teenagers will start to feel useful members of the society. Even small gestures like taking a 30 y.o.

man in a wheelchair for a walk or play a game with a 10 y.o. girl with autism can make these people

We care for the caregiver.

## Teengivers

Combine caregiving with technology for sharing experience

Describe a caregiver situation that you were/are involved in.

I am lucky to have some small experience as a caregiver. We used to make a few visits to groups of people with light mental disabilities with school when I was teenager. We spent some time with them, played, talked with them and learn about their way of life.

## Teengivers

Combine caregiving with technology for sharing experience

Explain the caregiver problem that resulted for you and/or other caregiver(s).

The thing I felt at that time was that teachers were presenting the whole issue as an obligatory lesson that you had to pass for school. I would prefer to be alone with my friends & classmates in this experience and not having "surveillance" all the time. In the end of the experience we had to write to our professors what this experience gave to us. Again I didn't feel like expressing myself to an adult, I would rather tell my friends about it, I thought they would understand me better.

We care for the caregiver.
