

1/2 SpyBlog

Solution

Idea:

Usual signs are "modified" to draw the attention to the data protection.

The sign presentations can be downloaded on a Microsite and have, quite by chance, also the original sign dimensions. Thus an existing sign could be also changed by means of Klebefolie.

The side offers beside a forum and the possibility them were given down to load also to insert the possibility own draughts hochzuladen and in the gallery. However, the entries become to begin with from one or several Admins on her contents a controlled.

The signs Skill easily also for demos are used and have an only low production expenditure.
