

1/6 NoThyme Vending System

Create your own food using the vending machine of the future.

THE NoThyme APP

CREATE your own food

Use the app to create your own food by selecting what available ingredients you want as layers or chose between some well established recipes. Have fun each day by combining fresh elements from a new batch.

ORDER it easily

Look at your schedule and place your order on the closest machine in your way. Your food will be waiting you in a safe place.

SPICE it up

Once you've got the food take a look on the app for the best spices for your combination and cut some fresh herbs from the greenhouse.

Solution

With a new way of looking at food the NoThyme Vending aims to provide the busy digital nomads with healthy and customized food in literally no time. Use the app to create your food then send your order... the machine will place your delicious treat in a safe locker until your arrival. Use the herbs in the greenhouse to spice up your food and enjoy your meal. You can try something new everyday, because with NoThyme the range of options is endless.

Create your own food using the vending machine of the future.

What other amazing features does your concept offer?

It's written in the slides :D

5/6

NoThyme Vending System

Create your own food using the vending machine of the future.

What is the core idea behind your campus food experience?

The NoThyme Modules could replace the traditional idea of kitchen, becoming the central element of any campus canteen design. Their best advantage is that they can be integrated easily in any given space, big or small and they require less utilities, space and people as the traditional alternatives.
