

1/5 **Lady, Onward!**

Shouldn't workplaces adapt to women and not the other way round?

Today's dreams, Tomorrow's Future Of Work

Global surveys to identify aspirations, trends, and to convince lawmakers that if their nations lag in women-friendly workplaces, their nations will also lag in global competitiveness.

Rising female entrepreneurs, executives, freelancers, coders and virtual store operators, and women consumers' economic clout become a catalyst for accelerating changes.

MOOCs, alternative educational /training opportunities, crowdfunding, digital economy and other factors will contribute to preparing women for that future.

A better future for women in the workplace will be a better future for ALL in the workplace.

Solution

Please see the slides

How do you think this future will play out? I look forward to reading your comments.

2/5

Lady, Onward!

Shouldn't workplaces adapt to women and not the other way round?

Describe your idea in less than three sentences.

Society, Lawmakers, Organizations realize that workplaces should adapt to women, and not the other way round. A better future for women in the workplace will be a better future for ALL in the workplace. Brief allusions in the slides; specific details in person if asked.
