

1/5 Deceptive Perspective

Understanding the depth of perspective.

"CHANGE IS THE ONLY CONSTANT"
—HERACLITUS

In the past decade or more, the industry and its leaders have shaped the recent graduates or experienced professionals in the way the organization desires. The project that they get hired into, generates requirements and the employee has to fulfil them accordingly. With the advancement in technology and developing interests of people, we are on a course of creating friction between the work requirement and what the young mind aspires. A lot of times in an organization, the management lacks the insight on the needs of their employees.

The current generation that will shape the future of this world, is extremely talented, dynamic, skilful and always 'on-the-go!' Yet they lack patience and the grit to develop a healthy long term future for themselves. The fast paced life that the advancements in daily activities have brought, creates a mesmerizing effect of expedited satisfaction.

*"YOU MUST LOOK WITHIN FOR VALUE,
BUT MUST LOOK BEYOND FOR PERSPECTIVE."*
—DENNIS WAITLEY

The success of each relationship lies in understanding the point of view of one another. Leaders, recruits, staff and entrepreneurs, individually have to make an effort to decode this deceptive perspective by putting themselves in each other's shoes. No matter what the eventual goal, there are always multiple ways to achieve it. It is a difficult task to visualize and open your mind to the path that is not yours. This requires some new ideas and out-of-the-box thinking on each end. But once you do, you find the crossroads to success. Understanding this perspective, leads to profit, long term satisfaction and trust.

*"EVERYTHING WE HEAR IS AN OPINION, NOT A FACT.
EVERYTHING WE SEE IS A PERSPECTIVE, NOT THE TRUTH."*
—MARCUS AURELIUS

Solution

Perspective is an illusive idea, but when you follow the path beyond, with the correct resources, talent and outlook you can achieve great things. This idea challenges the brain to think in a way which is hard to realize. Future of Work requires us to create a healthy relationship between the employee and the employer or the team of a start-up. The current generation is learning to be independent, flexible, dynamic, yet, lack the skills of loyalty and trust towards their colleagues. Understanding the requirements of work and your organization, will allow the young minds to mend their thinking process to develop new ideas. The current leaders and management have to understand their recruits and adapt the style of working which provides learning, confidence, comfort and a sense of achievement in the team. This will help provide an atmosphere for growth and innovation.

2/5

Deceptive Perspective

Understanding the depth of perspective.

Describe your idea in less than three sentences.

The future of work requires our leaders, entrepreneur and new hires to look at what others see. Success, the common goal, can be achieved only when the employer and employee understand each other's perspective. Employee's skills and Employer's resources together lead the way to steady meaningful collaboration (Cover Design).
